Applicant's election of Group 2 in the reply filed on dated 11/13/06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Vittone et al.

Vittone et al discloses a device comprising: an exercising frame an operating apparatus (fig. 7 element 120) a load group (160) a plurality of transmission members in the form of pulley's, a cable trained over said pulley's, the cable path including a exercising section defined by consecutive transmission members and said consecutive transmission members provide rotational movement of at least on exercising section about the transverse axis.

Vittone et al discloses the pulley/transmission members as being pivotally and (transversely) rotatably mounted to the frame.

In regard to claims 14-16 the interpretes sections of the cable (33) as exercising sections. In light of this interpretation Vittone et al discloses several sections of his device, which are positioned horizontally and vertically.

In regard to claim 17 Vittone et al discloses a load group in the form of weight plates where weight may by added and subtracted to obtain adjustable load values.
